\$20

All proceeds will be donated to Dean Leibfried

January 14, 2022, a sudden fall on the snow/ice on a winter day – was it a blessing or a curse? This fall resulted in a fractured neck, but imaging revealed more than just a fracture. Lesions were found on the spine and ribs. An elevated PSA blood test led to additional testing and two biopsies. This confirmed a diagnosis of Stage IV Metastatic Prostate Cancer. It has spread to the bones. Dean has completed radiation, receives hormone therapy drugs daily and IV infusions. He is currently receiving chemotherapy treatments.

Please join us in helping Dean in his journey!
